

àlô — WEBSITE ARCHITECTURE

Shrine of Tales

1. HIGH-LEVEL STRUCTURE

Think of the site as 4 layers:

1. Public Layer (Readers)
 2. Creator Layer (Writers)
 3. Shrine Media Layer (AI + Featured content)
 4. System Layer (Backend + Admin)
-

2. PUBLIC WEBSITE (FRONTEND PAGES)

2.1 Homepage (The Shrine Entrance)

Purpose: first impression + discovery

Sections:

- Hero (àlô logo + tagline)
 - Featured Stories
 - Shrine Screen (AI videos)
 - Categories (Stories / Poems / Comics / Essays)
 - Writers Spotlight
 - Quote of the Day
 - Latest uploads
-

2.2 Explore Page (Discovery Hub)

Like a calm library:

Filters:

- Stories
- Poems
- Essays
- Comics
- AI Stories

Sorting:

- Latest
 - Trending
 - Featured
 - Most read
-

2.3 Story Reader Page

This is VERY important.

Features:

- clean typography mode
 - fullscreen reading option
 - bookmarks
 - comments (optional toggle)
 - estimated reading time
 - “listen to story” (future AI audio)
-

2.4 Category Pages

Each category has its own shrine:

- /stories
- /poems
- /essays
- /comics
- /ai-stories

Each behaves like a mini-collection.

2.5 Writer Profiles

Each writer has a profile shrine:

Includes:

- profile name
- bio
- total works
- followers
- badges
- published works list

Example:

`/writer/inkwalker`

☐ 2.6 Submit Page (Write to àlọ)

Where writers upload content:

- title
 - type (story, poem, etc.)
 - content editor
 - tags
 - optional media upload
-

2.7 Shrine Screen (AI Media Hub)

Unique feature of àlọ.

Includes:

- AI-generated story videos
- cinematic shorts
- motion comics
- narrated stories

Example:

`/shrine-screen`

2.8 Auth Pages

- /login
- /register
- /forgot-password

Users:

- readers
 - writers
 - admins
-

3. CREATOR SYSTEM (WRITERS)

Writer Dashboard

/dashboard

Features:

- create new story
 - edit drafts
 - view stats
 - manage published works
 - comments moderation
 - earnings (future)
-

Writing Editor

Supports:

- rich text
 - markdown
 - image embedding
 - draft saving
-

Publishing Flow

4. SHRINE MEDIA SYSTEM (DIFFERENTIATOR)

This is what makes àlô unique.

AI Story Pipeline:

```
Written Story
  ↓
AI Script Enhancement
  ↓
AI Voice (optional)
  ↓
Cinematic Video
  ↓
Published in Shrine Screen
```

Media Types:

- cinematic story videos
 - animated poetry
 - audio narration
 - motion comics
-

5. ADMIN SYSTEM

Admin Dashboard

/admin

Controls:

- approve/reject submissions
- feature stories on homepage
- manage users
- ban/moderation tools
- content analytics

6. BACKEND ARCHITECTURE (SUPABASE MODEL)

Since you're using Supabase:

DATABASE TABLES

1. users

- id
 - name
 - email
 - role (reader/writer/admin)
 - bio
 - avatar
-

2. posts

- id
 - title
 - content
 - type (story/poem/essay/comic)
 - author_id
 - status (draft/published/featured)
 - created_at
-

3. comments

- id
 - post_id
 - user_id
 - content
-

4. likes

- user_id
 - post_id
-

5. followers

- follower_id
 - following_id
-

6. media

- id
 - type (ai_video/audio/image)
 - url
 - linked_post_id
-

7. categories

- id
 - name
-

7. SYSTEM FLOW (HOW EVERYTHING CONNECTS)

User → Homepage
→ Explore Content
→ Read Story
→ Follow Writer
→ Write Story
→ Publish via Dashboard
→ Story appears in Shrine Feed
→ Featured by Admin (optional)
→ AI version may be generated (Shrine Screen)

8. NAVIGATION STRUCTURE

Top navigation:

àlq´logo

```
[ Explore ]  
[ Stories ]  
[ Poems ]  
[ Shrine Screen ]  
[ Write ]  
[ Community ]
```

9. DESIGN ARCHITECTURE (VERY IMPORTANT)

Core Rule:

“Everything should feel like entering a shrine, not scrolling a feed.”

UI Principles:

- slow transitions
 - soft fades
 - large typography
 - minimal buttons
 - no clutter
 - emotional spacing
-

10. SCALABILITY ARCHITECTURE

Later expansion:

Phase 2

- mobile app (React Native / Flutter)
- audio storytelling

- offline reading mode

Phase 3

- AI writing assistant
- story-to-video automation
- writer monetization

Phase 4

- publishing platform
- anthology collections
- African literary archive

FINAL STRUCTURE SUMMARY

FRONTEND

- Homepage
- Explore
- Reader
- Writer profiles
- Shrine Screen
- Dashboard

BACKEND

- Supabase auth
- posts system
- media system
- social interactions

CORE IDEA

A literary shrine where African stories live, evolve, and become cinematic.

IMPORTANT INSIGHT

What you're building is NOT:

- a blog
- a social app
- a writing platform

It is:

A storytelling ecosystem + digital literary shrine + AI media studio
